Allegro Sampling Pumps, Cassettes, Flow Meters & Accessories

T100 Rotary Vane

This lightweight, low maintenance, rotary vane sampler, manufactured by Allegro Industries, has a sampling range of 3-20 LPM, and is excellent for use for sampling asbestos (25mm cassettes), lead (37mm cassettes) and mold (mold cassettes). This sampler is the best value in the market today, meets OSHA and AHERA standards and comes complete with adjustable aluminum tripod, six feet of vinyl tubing, inline filters, muffler jars, feet, handle and built-in switch.

Weight: 9.7 lbs.

Part No. 9803

T100 Sampling Pump
with Stand, List Price:
\$228.50

Part No. 9803-88

T100 Sampling Pump
without Stand, List
Price: \$207.25

T100M Rotary Vane

This upgraded version of the T100 Sampling Pump (rotary vane) is manufactured by Allegro Industries, and incorporates all the features of the T100 with the addition of a built-in adjustable 5-50 LPM flow meter. The sampler is specifically designed to be used for not only asbestos, lead and mold cassettes, but will work with Impactors (adjustable flow range 3-30 LPM). It comes complete with adjustable aluminum tripod, six feet of vinyl tubing, inline filters, muffler jar, feet, handle and built-in switch. Weight: 9.9 lbs.

Part No. 9803M

T100M Sampling Pump
with Stand, List Price:
\$257.25

Part No. 9803-88M

T100M Sampling Pump
without Stand, List
Price: \$235.75

A100 Rotary Vane

This low maintenance rotary vane pump by Gast Manufacturing meets OSHA and AHERA standards for air sampling. With a sampling range of 3–20 LPM, the A100 is excellent for use for sampling asbestos (25mm cassettes), lead (37mm cassettes) and mold (mold cassettes). The pump is complete with an aluminum tripod, five feet of vinyl tubing, inline filters, muffler jars, feet, handle and a power cord with switch. Weight: 11 lbs.

Part No. 9804

A100 Sampling Pump
with Stand, List Price:
\$392.95

Part No. 9804-88

A100 Sampling Pump
without Stand, List
Price: \$371.50

DC Sampling Pump

This unique DC powered, totally self-contained programmable unit is designed specifically to run mold cassettes. Flow range is 5–20 liters, but it is programmed for 15-LPM operation for use with mold cassettes. Preprogrammed buttons offer convenient sampling times of 1, 2, 5 or 10 minutes. An end-of-sample audio/visual alarm indicates completion of the sample. There is easy keypad calibration with the supplied calibration flow meter, as well as a charger included in the kit. The DC powered pump allows for 5 hours of continuous operation. It is small, lightweight, compact and includes an adjustable tripod, with a special adapter to hold the DC pump at the breathing air zone. Weight: 1.2 lbs.

Part No. 9801-51

DC Sampler Kit with
Stand, List Price:
\$671.50

Part No. 9801-50

DC Sampler Kit without
Stand, List Price:
\$642.95

D-2 Moldlite Sampler

This lightweight, low maintenance, high-efficiency, linear oscillating pump has a sampling range of 3-33 lpm. It is excellent for sampling mold using all types of mold cassettes, as well as Impactors. D-2 is the best value on the market today for IAQ market, having a long life of 35,000 hours of continuous use, with only two moving parts. It is extremely low maintenance, no lubrication is required, and it is very quiet. It comes complete with a 5-30 lpm fully adjustable flow meter, tripod, six feet of vinyl tubing, and has a built-in handle and switch for added convenience.

Part No. 9800

D-2 Sampler with
Stand, List Price:
\$225.50

Part No. 9800-88

D-2 Sampler without
stand, List Price:
\$205.50

Allegro Impactor

A single stage bioaerosol impaction sampler to sample mold and fungi with 400 precision drilled holes and a base section, which holds a standard dish for agar media. The Allegro Impactor is a proven performer for collecting viable mold samples.

**Part No. 9804-15,
List Price: \$399.00**

Flow Meter

Allegro's flow meters are separate from the pump to allow the user to set the flow for more than one pump with the same meter. Features an expanded scale and includes necessary adapters for use with particulate cassettes.

Part No. 9804-03

Flow Meter, 0-20 LPM,
List Price: \$62.00

Part No. 9804-031

Flow Meter, 3-30 LPM,
List Price: \$67.50

Part No. 9801-03

DC Sampler Flow
Meter, List Price:
\$100.00

Sampling Pump Carry Bag

High quality nylon bag is padded to protect your sampling products. The large bag is designed to contain up to two sampling pumps with stands, cassettes, Impactors, and all of your on-the-job sampling needs.

**Part No. 9801-B, List
Price: \$59.95**

Wall Sampling Adapter Kit

Requiring only a small 3/8" hole in the wall to sample, place the tubing attachment into the wall and the connection is made directly to all major mold cassettes. Completely disposable, there is no need to clean or worry about cross contamination. Kit includes: 10 Wall Sampling tubes and 1 Plunger rod.

**Part No. 9803-01,
List Price: \$18.50**

M2 Multi-Mold Cassette

The M2 is a patent-pending two-sided sampling cassette for easier and more efficient use in the field and in the laboratory. This is the first cassette to provide sampling options to field personnel. Each cassette can be used to collect two different samples, two identical samples concurrently, or one sample while using the other side as a control. The M2 Cassette is also the very first of its kind for laboratory personnel. It provides one-time preparation for two samples, pre-printed traverse marks on the collection side for standardized counting, and size-by-side comparison of the samples under the microscope.

Part No. 9804-21
Box of 5 Cassettes / 10
samples, List Price:
\$32.90

Part No. 9804-20
Box of 25 Cassettes /
50 samples, List Price:
\$164.50

**Lead Cassette**

This 37mm, MCE cassette is .8µm mixed cellulose ester and is specifically designed for lead sampling. 50 per box.

Part No. 9804-14,
List Price: \$54.25

**TEM Cassette**

This 25mm, .45µm + -5.0µm cassette is designed for asbestos final clearance testing. The cassettes incorporate a 2" static conductive extension cowl and meets all applicable standards. 50 per box.

Part No. 9804-17,
List Price: \$48.25

**PCM Cassette**

A 25mm cassette with .8µm pore size for asbestos sampling. The high quality cassette incorporates a 2" cowl and meets stringent quality standards. 50 per box.

Part No. 9804-16,
List Price: \$36.50

Additional Sampling Pumps

9804-51, Diaphragm Sampling Pump with Tripod Stand, List Price: \$281.50

9804-50, Diaphragm Sampling Pump without Tripod Stand, List Price: \$260.00

Additional Cassettes Accessories

9803-14, Bio Tape, 10 Per Package, List Price: \$8.95

9803-15, Bio Tape, 50 Per Package, List Price: \$42.50

Tripod Stands

9804-09, Tripod Stand for Impactor or DC Pump, List Price: \$37.50

9801-09, Dual Tripod Stand for M2/Air-O-Cell and Impactor, List Price: \$45.00

9804-08, Tripod Stand for Sampling Pump, List Price: \$29.95

Adapters

9804-18DC, M2 DC Pump Meter Adapter, List Price: \$3.60

9801-05, M2 DC Pump Adapter, List Price: \$3.60

9804-08D, DC/Impactor Stand Adapter, List Price: \$11.80

9804-08A, Mold Stand Adapter, List Price: \$11.80

9804-07A, Air-O-Cell Tubing Adapter, List Price: \$6.05

9804-19, Lead Cassette Tubing Adapter, List Price: \$6.05

9804-03AC, Flow Test Adapter, Air-O-Cell Cassette, List Price: \$15.00

9804-15A, Flow Test Adapter for Impactor, List Price: \$6.05
